## Energex Hardwood Pellets

Manufactured out of Mifflintown, PA, these premium hardwood pellets are made of the finest blend of hardwoods that provide an ash content well below the industry standard of 1%. With the listed BTUs, these hardwood pellets can put out a lot of heat with low ash at a great low price. 8500 BTU's per pound.

**\$244 Ton**

## Energex Blend

Manufactured out of Lac-Mégantic, Quebec, the premium blend is truly the best of both worlds. The blend is approximately 60% softwood and 40% hardwood which provides higher heat output and a lower ash content. This is one of the best premium grade pellets out there with an ash content between 0.5% and 0.7% 8700 BTU's per pound.

**\$269 Ton**

## New England 80% 20% Blend

New England Wood Pellets are a high quality, PFI Certified premium grade pellet fuel made from a proprietary blend of hardwood and other wood species. Quality characteristics are as follows: Ash content between .4% and .6%, 8000 BTU's per pound. 80 % hardwood — 20 % softwood

**\$257 Ton**

## Curran Blend

An ideal blend of northeast hard and softwoods to produce premium pellets that provide more BTU's per pound. These Premium Wood Pellets meet or exceed the PFI\* Fuel Grade Requirements for Premium Grade pellets based on the following independent test results: Ash content less than 1%, 8200 BTU's per pound.

**\$259 Ton**

## Curran Hardwood

These hardwood pellets will give you a long burning fire sure to satisfy your heating needs. These 100% Hardwood Premium Pellets meet or exceed the PFI\* Fuel Grade Requirements for Premium Grade pellets based on the following independent test results: Ash content less than 1%, 8000 BTU's per pound.

**\$259 Ton**

## Barefoot Wood Pellets

Barefoot is a superior low ash pellet. These pellets are manufactured from clean sawdust and other clean lumber materials from cabinets, hardwood flooring, etc. from woods such as cherry, maple, white/red oak & walnut. This pellet is smaller in diameter and offers high BTUs. The Barefoot facilities are located in Troy, Pa. They are consistent from batch to batch and has very few fines.

**\$274 Ton**

## Hamer Hot Ones

Hamers Hot Ones pellet fuel is made from clean sawdust, much of which comes from their own lumber operations in the heart of the Appalachian Region of the United States in West Virginia. The dust is compressed into pellets that produce clean, reliable heat with low emissions and an extremely small amount of ash. Hamers Hot Ones is the oldest residential pellet manufacturer in the Eastern United States.

**\$289 Ton**

## Dry Creek Wood Pellets

Dry Creek Premium Wood Pellets are one of the highest performing wood pellet fuels available today. All Dry Creek brand pellets are made from choice hardwood and are tested regularly to ensure quality, superior performance.

**\$269 Ton**

## Cubex Wood Pellets

Cubex is from a Canadian company called Lauzon, one of the top floor manufacturers. Cubex is 100% hardwood that is manufactured from hardwood flooring. This pellet is of premium grade with less than .4% ash and is 1/4" to 1" in length. Greater than 9000 BTUs.
