

ELECTRICAL CONNECTIONS

1. The Prescott Series is provided with a grounded electrical power cord that can extend from the rear of side. This should be connected to a standard 120 volt AC electrical outlet. The current requirement is approximately 3 amps. (5 amps with igniter running)
2. The power cord must be carefully routed to avoid contact with any hot or sharp exterior surface areas of the stove. (Figure 11B) Any stove installed in a mobile home must be electrically grounded to the steel chassis of the home and bolted to the floor in Model compliance with, and according to building code requirements.
3. In Canada, the electrical installation must meet the applicable requirements for CSA C22.2.
