

BIG HEAT!

PREMIUM WOOD FUEL PELLETS

100% Wood
**100% Natural**
Clean Energy

Making the transition from a hardwood pellet to a mixed wood blend or softwood pellet:

- ♦ Our pellet can provide a higher BTU than a hardwood pellet. You may need to adjust the settings on your stove for optimum burning.
- ♦ If your stove is not a multi fuel stove or doesn't show obvious adjustment dial-ins, we recommend that you contact your stove manufacturer for recommended setting adjustments.
- ♦ If you have questions during the transition, please feel free to give us a call.
- ♦ With the substantial shortage of hardwood pellets in the U.S., we are confident that you will be satisfied with softwood or blend pellets once you are "dialed in".
