

ALL NIGHTER STOVE Big Moe

48 lb. Heavy Cast Iron Door Radiates More Heat.

Manufacturer's Comment

One of the best known and most respected consumer safety agencies in the world has awarded their safety listing to the All Nighter Stoves. After extensive testing of the All Nighter stoves by Underwriters Laboratories Inc., of Northbrook, Illinois, the UL listing has been granted to All Nighter to be used on The Big Moe, Mid Moe and Little Moe models.

Here's how our stoves work—Our exclusive patented* Triple Air System Door controls the burning process by allowing just the right amount of air to enter the fire chamber. On the rear of this door is an exclusive patented* Air Baffle that creates a triple air flow. The primary air ignites the fuel and feeds the fire. The secondary air escapes the baffle above the flames, reignites and burns the volatile gases above the fuel for more complete combustion. The third air flow exits the top of the baffle and travels across the top of the fire chamber creating a barrier that stops any escaping, unburned, volatile gases and actually forces these gases back down into the flames to reburn. This triple air burning system insures more

complete combustion in all burning states resulting in maximum efficiency.

Next we added an exclusive Hot Air Distribution System* consisting of heavy tubes that are sealed off from the fire. This system has an optional blower unit that picks up cold air from the floor and circulates it through the inner tubes and blows heated air out at the top. This can add up to 10,000 BTU's per hour to the heating ability of the stove.

Finally, we added a unique optional hot water heater that fits into a recessed hot water jacket at the rear of the stove. This unit delivers piping hot water to your domestic water system practically free!

An optional coal grate turns this stove into an effective coal burner.

For those people who can not locate a local dealer, All Nighter Stove Works offers a unique factory-direct purchasing program. We will ship any of our 11 wood or coal stoves direct to you at prices that are well below our normal retail level. This has been done to offset the shipping charges involved and still save you a considerable amount of money. If you are interested in purchasing a stove direct

from the factory at these reduced prices, send for our free 24 page catalog and ask for Factory Direct Bulletin No. 81.

Specifications

| | |
|-------------------|----------------------------------------------------------|
| Height: | 31½ in. |
| Width: | 23½ in. |
| Depth: | 41½ in. |
| Flue Height: | 28½ in. (top) (legs adjustable to other flue heights) |
| Flue Size: | 6 in. |
| Log Length Cap.: | 26 in. to 28 in. |
| Weight: | 545 lbs. |
| Heating Capacity: | 22,500 cubic feet |
| Testing: | Listed by Underwriters' Laboratories |
