

FIRE-VIEW® Wood Heater Model 270

Manufacturer's Comment

Fire-View®'s patented design allows you to view the fire and, at the same time, have a radiant heater with efficient burning capabilities. Other valuable features include:

- ... a tempered glass viewing window that allows a clear view of the fire throughout the burning process.

- ... a patented top vent that allows a constant flow of air over the glass to keep it cool and free from smoke and soot. Also creates a constant flow of chimney gases up the flue so that the Fire-View, when professionally installed with the correct chimney and using the proper fuel, does not contribute to the formation of creosote.

- ... patented tubular design that provides a large radiant heating surface that is less susceptible to warpage when the proper size Fire-View is used.

- ... high quality 12 gauge, 3/16" and 10 gauge steel construction.

- ... firebrick lining to provide years of maintenance-free operation.

- ... for your cooking convenience, two flat areas on top of the heater designed to hold pots and kettles.

- ... a draft tube located at the base

of the firebox for complete combustion. The sliding draft adjusts combustion air volume.

- ... a convenient loading door located at the right end of the heater. (Left end loading is available.)

- ... a patented collapsible door behind the glass that can be closed for unattended burning or to remove the glass for cleaning.

- ... blowers available for all Fire-View models to modify your heater into a simple hot air furnace system.

Three sizes of Fire-View to choose from in Standard, Fireplace and Utility models. Sizes range from 16" to 22" diameter, with wood length capacities ranging from 20" to a full 30". Radiant heating surfaces range from 9½ sq. ft. on the smallest to an amazing 20 sq. ft. on the largest. Firebox sizes range from 2.7 cu. ft. to 8 cu. ft. In other words, there is a Fire-View wood heater to meet every need. Fire-View wood heaters are manufactured in the U. S. and are distributed nationwide by Fire-View® Products, Inc.

Fire-View has ICBO and mobile home approved units available, as well as a special Model 270 designed to burn hard coal.

Fire-View has design and mechanical patents in the U.S. and Canada.

Specifications

Height:	25 in.
Length (inside):	27⅞ in.
Width:	Including draft, 27¼ in.
Width:	Including blower, mounted 33¼ in.
Diameter:	20 in.
Flue Size:	7 in.
Log Length Cap.:	24 in.
Weight	
(with firebrick):	Approx. 208 lbs.
Door Opening:	Approx. 10 in. x 14 in.
Pot Holder (dia.):	7 in.
Radiant Heating	
Surface:	14 sq. ft.
Firebox Size:	5 cu. ft.
Glass Size:	10 in. x 20 in.
