## DIMENSIONS

Length .....	32 inches
Width .....	18-1/2 inches
Height .....	28-3/8 inches
Weight .....	399 pounds

The Fisher Stove is actually three appliances in one – Heater – Cook Stove – Trash Burner.

The revolutionary engineering is so unique that a patent is being granted on the design of the fire chamber.

It will enhance, but not dominate the decor of any room in your home.

It will eliminate the need for starting a fire on cold mornings, as it will hold fire for up to 24 hours.

Combustion is almost 100% for greater fuel economy.

It will not smoke when the door is open.

The exhaust connection extends into the fire chamber to provide even heat distribution on all sides of the stove.

It is adaptable to any chimney, including fireplace flue.

Firewood is our only replenishing resource for energy, and the most economical. It will heat a 2,000 foot home for about \$7.00 per month.

**You are welcome to come in and inspect the fantastic Fisher Stove.**
